## About This Game

Keep your brain trained with Colonumbers!

In each row there are 4 boxes with numbers. At the beginning you have only 0 and 1. Click on the number to change it.

Remember that you can transform even numbers to 0, 2, 4, 6 and 8 and odd numbers of course to 1, 3, 5, 7 and 9.

You have to arrange the numbers in ascending order from left to right. You can put only different numbers in the same column to complete the game.

Do you like challenges? Complete 4 games in 4 minutes! Do the best you can. It may not be enough!

1	2	4	6	👍
👍	👍	👍	👍	

---

The "rules" are poor at best. It says to get increasing numbers going right horizontally but does not say anything about vertically. There is no way to get thumbs up on all columns horizontally and vertically. Even when there is a series of thumbs up on the horizontal rows the game does not end and move on to a new level. One of the poorest games I have seen.
